

Vacancy

Trainee Engineer, based in Ystrad Mynach

SCS Group is the leading contractor in the smoke control, passive ventilation and control and automation fields and offers fully integrated BMS systems to its client base of major M&E contractors. We are involved in projects including education, health, commercial developments and high rise residential buildings.

About the role

As a Trainee Engineer, you will learn about project managing electrical services, smoke ventilation and passive ventilation projects, as well as estimating these jobs. During the training programme you will gain experience in every department of the specialist contracting business.

You will also add to your skills by completing a day-release course, training to become an electrical engineer and attending Coleg Morgannwg to complete a BTEC and then HNC in Electrical Services for Buildings.

Throughout the programme you will be fully supported by a mentor who will help you to reach your full potential; following the programme, the sky really is the limit!

About the candidate

We require Maths and Physics 'A' levels as a minimum, however would consider a candidate who has completed a craft apprenticeship in electrical installation.

The job requires flexibility as there is an element of travel to sites across the country which might require additional hours or staying away from home.

Rewards

The package on offer includes a competitive salary, plus other extras once the training has been completed such as pension contributions, car allowance, laptop, mobile etc. We offer an industry-leading training programme and opportunities for progression within the organisation.

Please send CVs to Macarena Machado m.machado@groupscs.co.uk.
